

Requirements for Pre-K, K, 2nd, 7th, and 12th Grade Students

Pre-K

Since Pre-K students are new to the school system, they are required to have the following documents to begin school:

- A Yellow Card with the state approved immunizations, stamped by the Wyoming County Health Department;
- A comprehensive health exam (Health Check);
- A dental exam signed by a dentist or licensed hygienist; and
- Vision and hearing exam completed with the health check exam or by a separate provider.

Kindergarten

Kindergarten students that have not attended Pre-School or Head Start are required to have the same items as Pre-K. However, they will need updated immunizations. Their immunizations should be on a green card stamped by the Wyoming County Health Department. If the K student attended Pre-K or Head Start, the only new requirement is that updated immunizations are on a green card stamped by the Wyoming County Health Department.

2nd Grade

It is recommended that students entering the 2nd grade have an updated dental exam and comprehensive health exam.

7th Grade

It is recommended that students entering the 7th grade have an updated dental exam and comprehensive health exam.

All students entering the 7th grade are required to show proof of immunizations required by the state: Menactra or MCV4, and Tdap. Immunization proof should be provided to the Wyoming County Health Department for documentation on their blue card.

12th Grade

Students entering the 12th grade have the same requirements as 7th graders.
